

Individual Planet Variations (Annual Analysis)

Bishal Ghimire

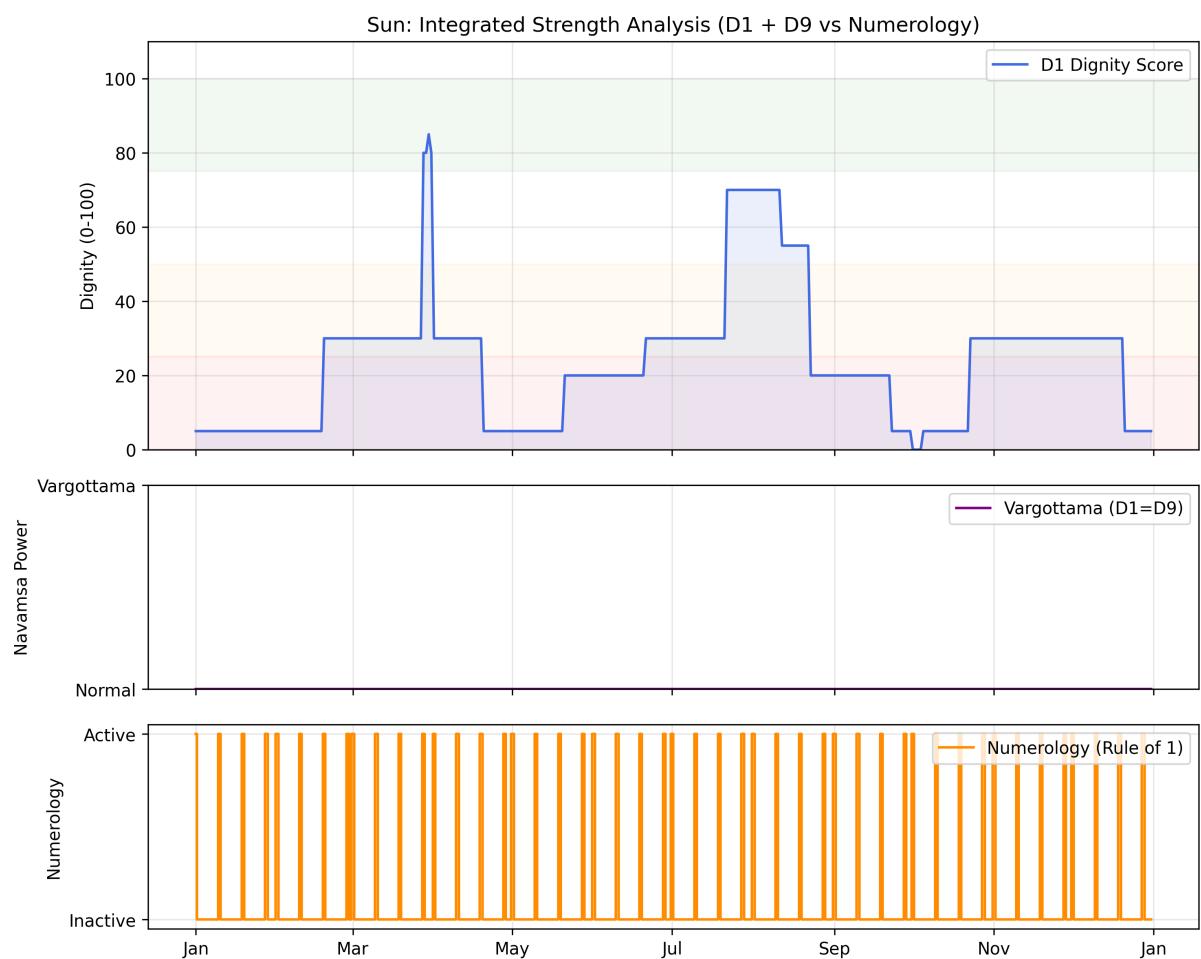

This section presents the detailed daily traversal of each of the 9 Grahas (Planets) for the year 2024.

For each planet, we visualize: 1. **Top Chart (Astrological Reality)**: The continuous fluctuation of planetary dignity/strength (Shadbala-proxy) based on astronomical position, retrograde motion, and sign placement. 2. **Bottom Chart (Numerological Projection)**: The discrete “influence” as projected by daily numerology (Mulanka).

This direct visual comparison exposes the granularity mismatch: while the Planet (Top) moves in complex, non-linear harmonic waves, the Numerology (Bottom) forces a rigid, low-resolution step function.
